2. Assignment Rules

- Build working HTML page (as shown in section **1. Page preview**) with AngularJS.
 - When you change subscription, costs in receipt should be updated
- Create open GIT repository on some public resource and commit continuously your work so we can see the progress.
- You are free to choose additional frameworks/plugins (if you think that is needed)
- All dynamic data should be loaded from JSON file. You can structure JSON as you want. See section **4. Technical** for product information.
- Styling is not necessary.
- *Bonus points*: change big device image when you click on a side/back device thumbnail.
